Aug 25, 2019

Dear Committee Chairs,

Here I highly recommend Zheng Li for ACSAC student conferenceships. I hope that he can get a waiver of the registration fee and partial support for his trip to attend the conference so that he can present his own paper there.

Zheng is a third-year postgraduate student in the School of Computer Science & Technology at Shandong University (Jinan Campus, and will graduate in June 2020). I was his supervisor when I worked at the School of Computer Science & Technology (I moved to School of Cyber Science and Technology, Qingdao Campus in June 2019). He has demonstrated great potential to become an excellent researcher. As an example, he published one ACSAC paper this year as the first author.

I strongly support his application and sincerely hope that he can get this grant, which will definitely help his promising career. On one hand, this could be an honor to acknowledge his hardworking on the accepted paper, and on the other hand, this would also give him a great opportunity to know other people in this area, exchange ideas with them, and come up with more work in the future.

The travel grant support is also important to make it possible for him to attend the conference and to present the paper by himself. Since I have moved to another department and another city, he may face problems to get financial support from his department.

We appreciate your consideration and help. Should you have any questions, please feel free to contact me.

Sincerely,

Shanqing Guo
